

# Eric Sung Cho

**Address:** 6410 Radiance Blvd.E Fife, WA

**Phone:** 253-224-8809 | **Email:** [E.Cho@gmail.com](mailto:E.Cho@gmail.com)

Recent college graduate passionate about web development

---

## #Skills

### Front End

HTML

JavaScript

CSS

### Back End

PostgreSQL

MySQL

### Source Control

GitHub

Git

### Frameworks

Django

Bootstrap

Flask

---

## #Project Portfolio

### Project 1 / Word Count Web-App

- ❖ Users will input the words in the form and hit submit which will then display how many words there were in total, the original text you submitted, and how many times each word has appeared.
- ❖ This was built with Python, Django, and HTML

### Project 2 / Portfolio

- ❖ Created my own website from scratch that includes projects, links to my Resume, LinkedIn, Github, and Blog.
- ❖ Django Admin linked with PostgreSQL database making add and edits to blog and project images and summaries easy.
- ❖ This was built with PostgreSQL(Back end), Django(Back end), Bootstrap (Front End)
- ❖ Hosted this website on the DigitalOcean server

### Project 3 / Product Hunt Clone

- ❖ Was able to clone the web application Product Hunt where users submit startup ideas hoping to have them launched once they have reached enough upvotes.
- ❖ This includes user authentication such as creating a user account, logging in/out, and loading product models connected with the user.
- ❖ Replicated the upvote system.

### Project 4 / Data Collector Web-App

- ❖ Takes data inputted by the user in a survey and the user will then receive an email about how their data compares to the average of all the users' data.
- ❖ HTML/CSS, Flask, PostgreSQL
- ❖ Hosted this web application on Heroku.
